

Little Buster™

Little Buster features a dual spring mounted base for added stability during high winds and new Step-n-Drop legs enable you to set-up in seconds without having to bend over or stoop down.

**TraFFix
Devices Inc.**

Set-up is a breeze with TrafFix Devices' Little Buster sign stand and Step-n-Drop legs.

Just follow the step-by-step instructions and see how easy it is to set-up Little Buster.

Instructions for doing the TrafFix Two-Step

1. Simply position the Little Buster sign stand with Step-n-Drop legs so the Sign Side label is facing oncoming traffic.

2. Place right foot on both release levers located between the legs and step down. Both legs will fall to the ground.

3. Walk to the other side of the Little Buster stand, place your left foot on both release levers and step down. The remaining two legs will fall to the ground.

4. Once all four legs are firmly on the ground, pull up on the mast to lock legs in place. Now you know how to do the TrafFix Two-Step.

Little Buster Sign Stand

Designed to hold 30", 36" and 48" aluminum or wood signs.

Telescoping mast allows for variable sign height adjustments.

Flag holder will accept standard 3/4" diameter wooden or plastic dowel flags.

Roll-up Sign Bracket

Holds any 30", 36" or 48" roll-up sign, and can be mounted on any stand.

Sign with cross bracing quickly snaps into roll-up sign bracket—can be mounted anywhere on mast.
